Current Position

Sciences Po **2026 -**
Post-Doctoral Researcher, affiliated with AxPo and the Department of Economics

Education

Ecole des Hautes Etudes en Sciences Sociales (EHESS) **2022-2026**
PhD in Economics

- Advisor : Philippe Askenazy
- Hosted by **Paris School of Economics** Labor Chair
- Visiting Student at **Vancouver School of Economics** in Spring 2026, sponsored by Raffaele Saggio

Paris School of Economics **2018 - 2020**
Master's degree, Analysis and Policy in Economics (APE)

Ecole Normale Supérieure Paris-Saclay **2017 - 2021**
BA in Economics and Grande Ecole Diploma

Job Market Paper

In Search of Working Time? Hours Constraints, Firms and Mobility

Abstract: Can workers find a job with their ideal working hours? This paper provides novel empirical evidence on hours constraints, i.e. barriers for workers to work their desired hours at a given wage rate, by linking self-reported hour preferences from large-scale survey data with administrative employer-employee data between 2003 and 2023. Twenty percent of French salaried workers report wanting to increase their hours at their given wage. Leveraging the panel dimension of my data, I show that constrained workers experience larger increases in hours and earnings than other workers by switching employers. However, most constrained workers remain unable to adjust their hours to their desired level within 5 years after their report. Next, I develop a revealed preference method to quantify welfare effects associated with constraints and find that workers would on average accept a 10% reduction in hourly wages to work in a job offering their desired number of hours. The results highlight the important role of hours worked as a job amenity in shaping labor market sorting.
